Reporting Period: March 1, 2015 – March 29, 2017

- 001

Substance:	Roundup Herbicide from Monsanto
Serial Number:	32405786
Date:	03/27/2017
Medical Outcome:	Death H-A
EPA Reg. No.	524-445
Active Ingredients:	Glyphosate 41%
State:	Arizona
History and Notes:	<p>Physician calling from a hospital about a "critically ill" man who reportedly drank Roundup last night 03/26/2017. He states it was a Gatorade bottle of Roundup, unknown formulation. No labels or product information known to be available. The man vomited, aspirated, and was intubated. The physician calling has limited information as he is just taking the case. The physician states they have consulted with the local poison center, Banner Poison and Drug Information Center, and was recommended to contact the industry line as well. MRPC discussed toxicity of glyphosate, and discussed other ingredients are possible. Advised symptomatic, supportive care, rule out other products, differential diagnosis.</p> <p>MRPC contacted the Banner Poison and Drug Information Center. Initial call from ED to Banner Poison Center was at 2308 3/26/17 with history of 35 year old male drinking 40 mL of unknown formulation of Roundup at 1900 03/26/2017. The man was not very forthcoming. He stated, 30 minutes later he had throat and abdominal pain, no chest pain, no blood in emesis. Patient was admitted to the CCU and toxicology consult was done at 0300. MRPC attempted to obtain further follow up from Banner Poison Center mid-afternoon on 3/27/17 but no new information was available.</p> <p>The following day, 03/28/2017, MRPC contacted the Banner Poison Center for update on the man.</p> <p>Follow up notes per Banner Poison Center: 03/27/2017 0212 Man was admitted to CCU with altered mental status, drunk like symptoms. APAP, ASA, UDS and ETOH - undetectable. Labs drawn 3/26/17 2317</p>
